

OHRA 

**Tried and tested –
bespoke racking systems from Kerpen**

An uncompromising customer focus and bespoke racking solutions for all industries. This is the philosophy that is the basis of the success of OHRA Regalanlagen GmbH since our foundation in 1979, a philosophy which has always kept us ahead of our competition.

As a medium-sized company with highly motivated and longstanding employees, OHRA provides engineering competence, flexibility and customer proximity that enables us to respond individually to customer requirements and create racking fully tailored for the business of our clients.

Combined with a superb product quality that sets the industry standard - all load-bearing racking components are made from solid core hot-rolled steel profiles and manufactured in our own purpose-built production facilities in Kerpen, Germany - OHRA has become the European market leader for cantilever racking and the specialist in Europe for the storage of particularly long, heavy or cumbersome goods.

OHRA 

O H R A

1979

Ottokar Hölscher founds a company to manufacture and sell racking systems.

1980

Expansion of the manufacturing and warehouse facilities at the Kerpen site.

1982

Foundation of the first export sales office in the Netherlands.

1985

Development of the cantilever rack hook-in system K60.

1988

Foundation of further sales offices and agencies in several European countries (e.g. Belgium, Austria, Switzerland, France).

1991

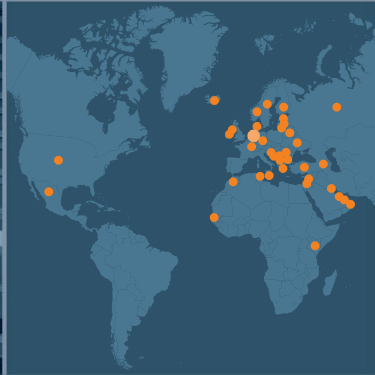

The OHRA -Robust- pallet rack (OHRA P3) is launched. In addition, the suspension hooks of the cantilever arms are revised. The arms can now be inserted horizontally into the column profile and locked in place using safety clips.

1992-1993

The very first million-euro order for the renowned kitchen furniture manufacturer Alno is booked.

1994

Dr. Andreas Hölscher takes over the management and systematically develops the international business.

1995

The beginning of a cooperation with Köttgen, a company specialized in the production of storage and retrieval machines.

1996

The construction of the first automatic cantilever racking system in Bamberg (Germany).

2000

Production and installation of a mobile racking system for the Zurich Opera House (Switzerland).

2002

The first projects in eastern Europe and the Baltic states are delivered and installed.

2012

Construction of OHRA's largest fully automatic cantilever racking system order for a major timber and building materials cooperative in France.

2017

OHRA converts its entire production to renewable electricity.

2018

The planning of a major expansion of the production facility begins.

2019

40th anniversary. Today, the company has an export share of approximately 60 percent and is represented by its own sales staff in 14 countries.

OHRA Today

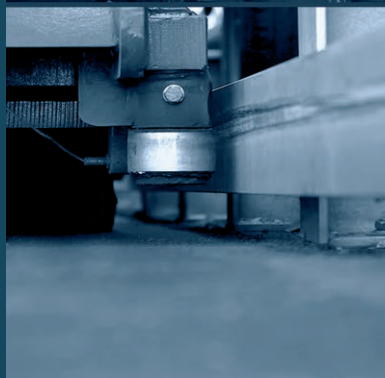

We are an international company. With our dedicated team of sales consultants in Germany, and in a further 14 European countries, we are active in the steel storage systems market.

In 14 other countries we are represented by trade partners. OHRA racking installations can be found in all 5 continents of the world.

We accompany our customers from the planning phases of initial consultations to the final handover. In every step of the project it is our endeavor to deliver the best possible service for our customers.

Due to the long experience of our engineers, we provide the answers to the individual questions of our customers and their planning staff.

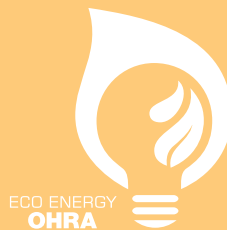

Unique

Each OHRA rack is unique. Our customers' requirements for their optimal storage solution are individual and diverse. No order is too small or too large. We manufacture on modern and efficient production lines to ensure the success of our customers and to meet their quality standards, today and in the future.

Sustainable

Robust, flexible and designed for high loads. Made from hot-rolled steel - a 100% recyclable material - our racking is genuinely built to last. Our approach on our use of resources and the environment has evolved. Since 2017 we manufacture exclusively with eco-electricity and we are continually striving to reduce waste of raw materials and energy consumption.

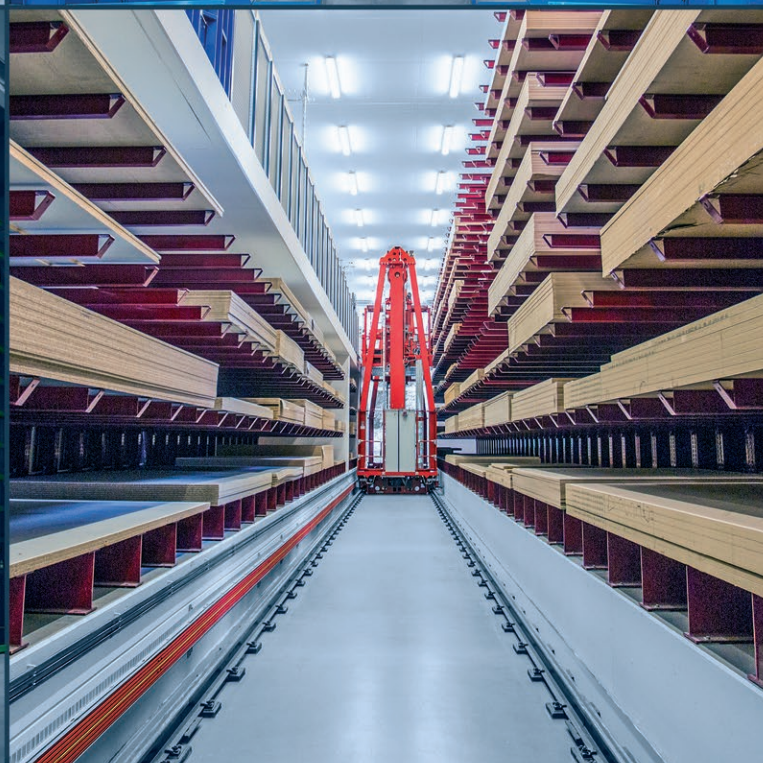

Service & installation, precision work

At every stage of a project, we strive to deliver the best possible service to our customers. Racking assembly and racking inspections are an integral part of our range of services. Our professional assembly teams and project design teams work in strict compliance with legal regulations. Our rack inspectors check your racking systems in accordance with the European norm DIN EN 15635. We grant a 10 year after-sales purchase guarantee for all replacement components to our customers.

Products

We are the market leader for heavy-duty storage systems. Our products are designed to endure the toughest operating conditions. Our portfolio ranges from a single cantilever rack to rack-clad buildings and fully automatic, computer-controlled racking solutions. From the beginning, the development of our range of products and services has always held pace with the requirements of our core markets.

Cantilever racks

Pallet racks

Mezzanines

Rack clad warehouses

Mobile racking

Chipboard racks

Gravity flow racking

Vertical racking

Shelving

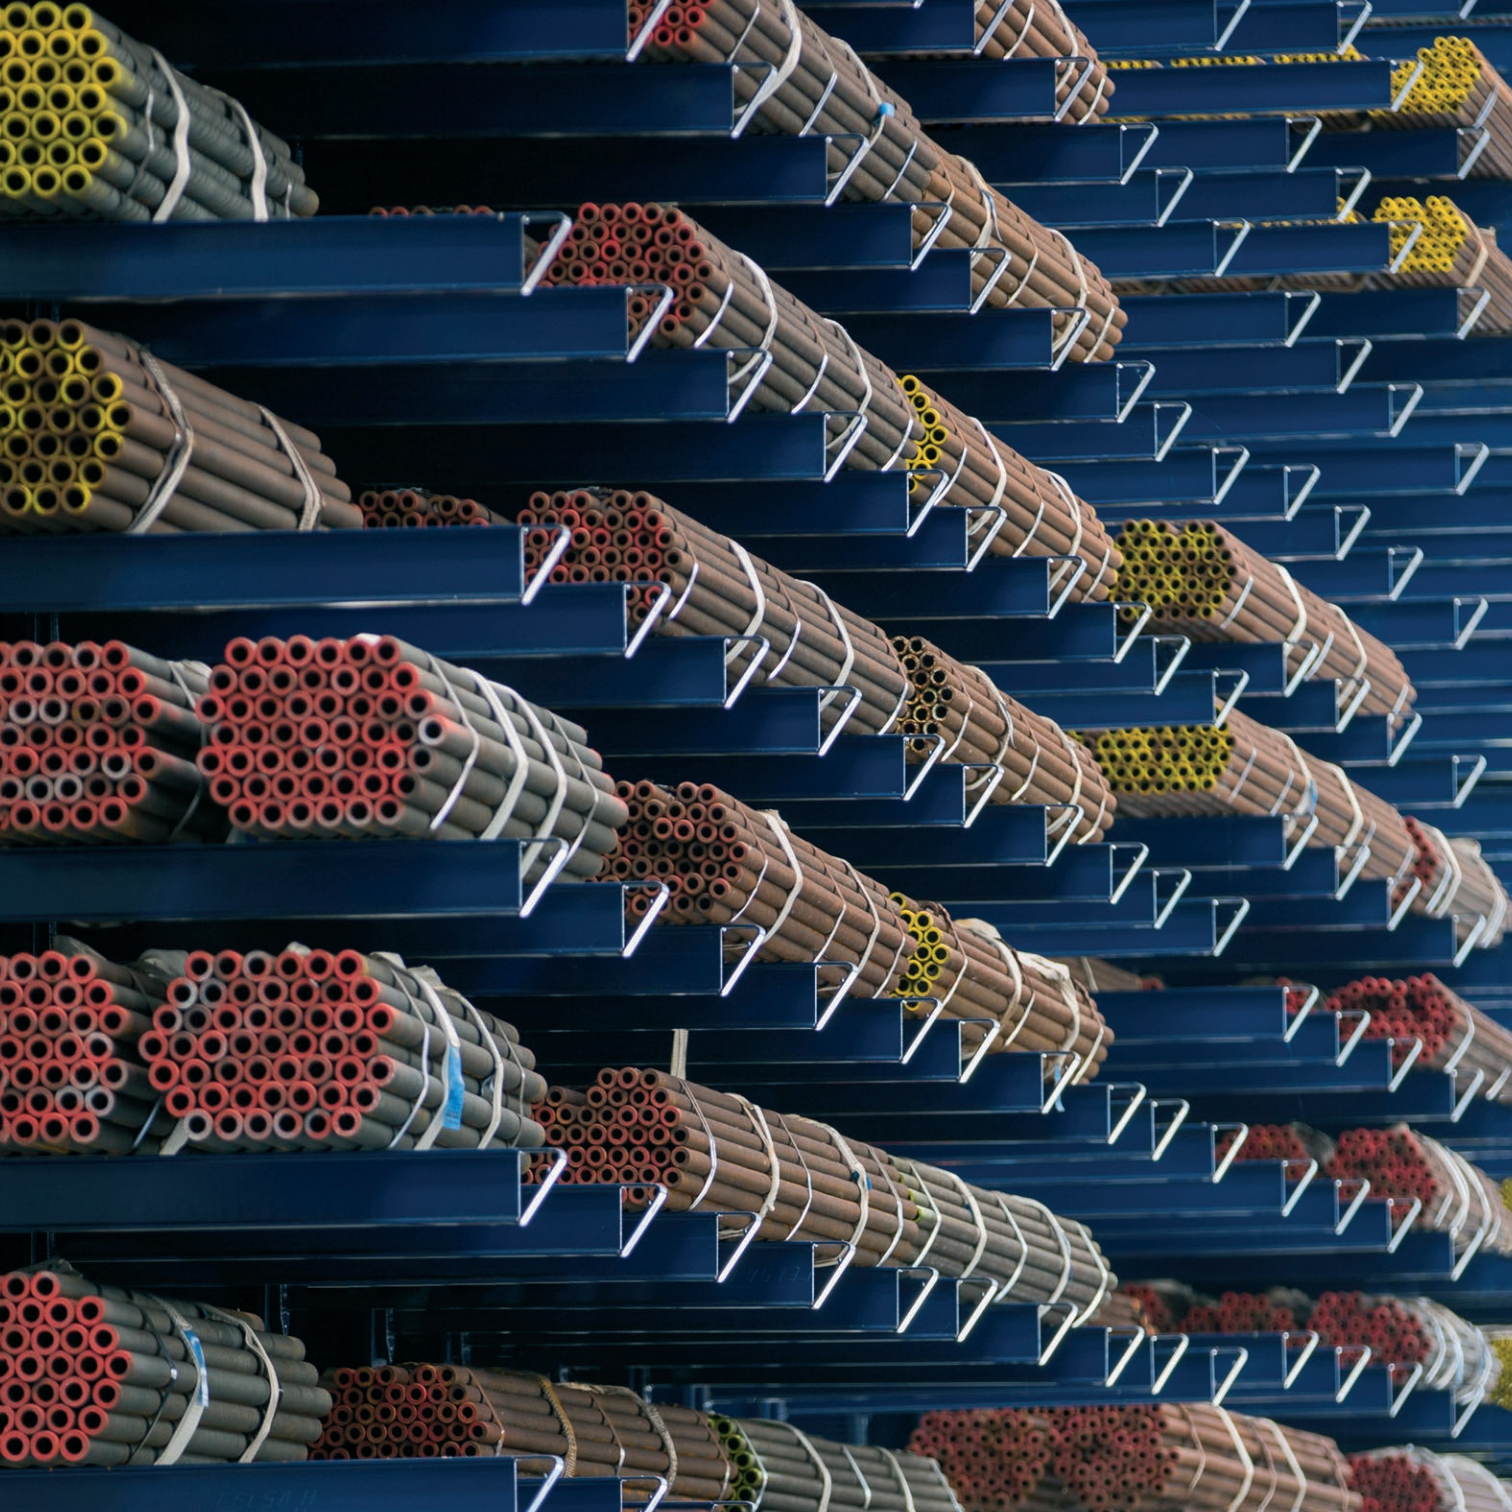

Push back racking

Racking for profiles

Racking for tiles

Drive-in racking

Automatic storage solutions

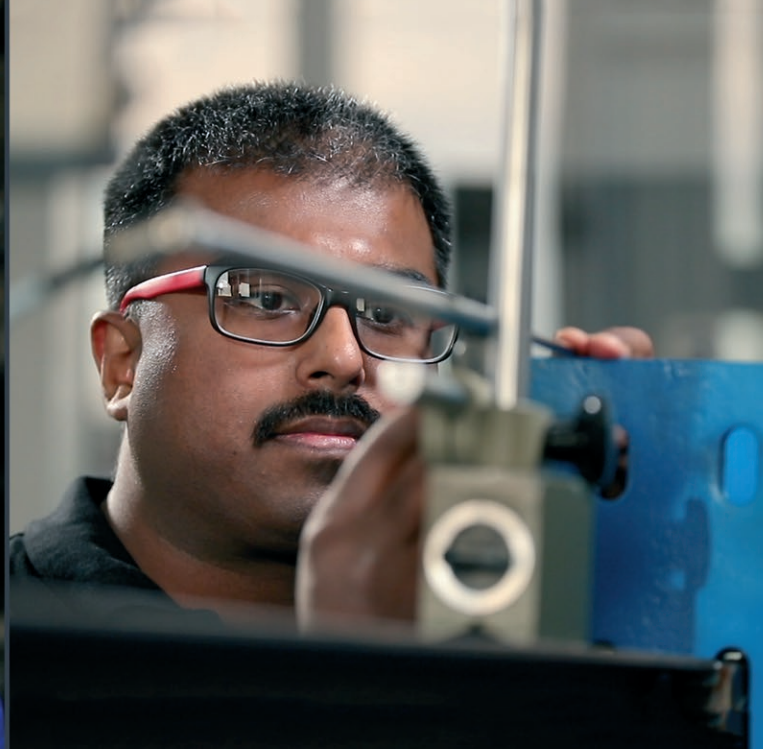

Industries

We can provide references from all branches of industry and trade. We supply racking systems to suit all company sizes and all industries. Whether in the timber, metal or building materials trade, in joineries or for heavy industry – our sales consultants always provide the right storage solution. And if your goods are heavy and unwieldy, OHRA racking will be your the natural choice.

The future

We actively accompany the daily change processes in our market and in society and have set our own impulses for the future. We attach great importance to a modern management structure, the continual training of our staff, and providing our apprentices with further employment opportunities after graduation within the company and our group.

We continually strive to improve our modern technical manufacturing facilities in line with the developments in the storage industry. It is our declared ambition to continue to grow our market presence worldwide in order to secure equally the future of the company and the jobs of our employees.
